

Kenneth Square Streetscape

Viridian Landscape Studio worked with lead design engineer Meliora Design to bring streetscape improvements to approximately 2,000 linear feet of West Cypress Street in Kennett Square, PA.

The improvements included the paving of a stretch of Cypress Street, a new water main, fire hydrants, curbs, sidewalks, ADA ramps, stormwater inlet repairs, and the addition of more than 70 trees. There is also a center island that was added for traffic calming. A gateway sign is expected to be added in the future.

While most of the improvements are below ground and therefore not visible to residents, such as a new 8-inch water main, these upgrades are nonetheless very important to the borough's revitalization efforts.

Location: Kennett Square, Pennsylvania

Client: Kennett Square Borough

Size: 28,750 sf

Cost: \$1.4 million

Status: Completed 2016
