First year, second year and general maintenance recommendations for plant establishment

Volunteers planting

Stormwater Basin Retrofit for East Whiteland Township

To ensure success of the East Whiteland Township Basin Retrofit project, the township was given a Two-Year Maintenance & Monitoring Plan for the establishment period of the plantings.

Annually, Viridian joins Trout Unlimited and East Whiteland Township for site observation and assessment of basin conditions. This maintenance training program includes a discussion with township officials on small storm management, outlet structure modifications, inlet stabilization, native plantings and planting techniques, as well as invasive management. This basin retrofit serves as a model for the Township, Pennsylvania Environmental Council and has been featured in the GreenTreats video, "Rethinking Basins: Putting Nature to Work" - <http://vimeo.com/33424531>

- Location: Township of East Whiteland, Pennsylvania
- Client: Valley Forge Trout Unlimited
- Size: 1 acre
- Cost: \$18,000
- Status: Completed 2006
