THESIS

Margins on the Motorway: Registering Mobility in the Urban
Interstitial Landscape

VICTOR TRUJILLO

Landscape Architect

As a landscape designer and project manager, Victor advocates for vibrant public spaces that foster connection and nourish the human spirit. He works closely with clients to develop and implement creative, contextual, and responsible landscape solutions. His passion for place-making is evident in work on projects like the Fairleigh Dickinson University Pedestrian Bridge, the transformation of the FDU Campus into a sustainable Eco-Park, and the campus improvements at Rowan University, among other master plans, streetscape improvements, and landscapes for learning and playing.

Before joining Viridian, Victor gained extensive experience out West as a project manager with SQLA in Los Angeles and as a licensed landscape architect with Sites Southwest in Albuquerque, New Mexico. He has been an active member of the American Society of Landscape Architects, serving on multiple advisory boards including the New Mexico Chapter Executive Board from 2011-2017 and as President of the chapter in 2016. These days, Victor's infant daughter keeps him pretty busy outside the office while inspiring him to continue making the world a better place.

Victor holds a Master of Landscape Architecture from the University of New Mexico and a BA in Fine Arts and Visual Culture from the University of Southern California.
